

NO-CODE, LOW-CODE

Document Workflow Automation

Document workflow needs automation!

Underlying issues with document workflows are:

Manual document workflows create bottlenecks

Not in Good Order (NIGO) form-based documents

Scaling is hard as automation is expensive & tedious

Bigger the document, harder the analysis

Document disconnect hinders productivity

Expensive software isn't always a solution

Faulty management raise compliance issues

Floating document processes compromise the security

Document workflow automation can be difficult

Automating organizations' internal operations is tedious and expensive. Companies tend to:

- ▶ Use expensive and high maintenance tools
- ▶ Spend more time creating a custom app
- ▶ Build numerous apps to ease one internal process
- ▶ Engage engineers to build internal apps causing productivity loss

Document workflows can be automated the easy way

Revv + Retool

Retool is a fast and easy way to build and maintain organizations' internal tools. It allows companies to:

- ⚡ Build any internal tools at a lightning speed
- ⚡ Save engineering time by 110x
